

Outdoor Facilities :: Before & After Our Transformation

Special design elements used in this area:

- Interior Systems Model SR3 6 seater in round and rectangular shapes. These units are sturdy with welded steel frames for durability
- The steel frames are surrounded by reinforced fiberglass construction to resist rust, abrasion and no sharp edges!

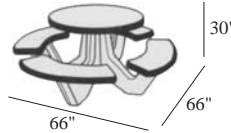

BEFORE: This is the former outdoor seating area at a High School in southern California. It looks like a prison. No girl would sit on these rusty and rough benches because they would ruin her clothes.

AFTER: Now the area is attractive and inviting to all students. Enclosed waste receptacles remove the temptation to make a “3-point shot” into an open trash can — and miss like they did in the picture at the top of the page.

The features of Outdoor Furniture- Metal Mesh construction with elastomeric Powder Coat finish are far superior to other finishes. The elastomeric powder coat enamel finish on this furniture is durable and weather resistant to last in the outside environment.

Universal Seating Company's metal mesh furniture is available with ADA accessible seating. This outstanding furniture comes with the properties required to "laser engrave" your school name or mascot in the tabletop or bench seat back.

It is a sad fact of life that we are experiencing an increase in student abuse and vandalism- especially of outside furniture. The reality is that this happens in schools- no matter what the neighborhood conditions.

While we at Universal Seating Company feel this is unfortunate, we are pleased to provide a solution for this type of vandalism. We recommend furniture with metal mesh construction and the new elastomeric powder coat finish for a couple of reasons. First, it does not give graffiti artists a solid surface to draw on AND it can be quickly repaired if it is scratched or scored by vandals.

All of our seating units can be easily repaired. Your own maintenance personnel can fix any nicks and scratches in the coating in the field- simply by using a heat gun and a bit of the colored powder enamel.

Our furniture is constructed of the strongest metal mesh steel for maximum durability. While we do not warranty vandalism, our metal mesh furniture with our finish repair feature is your best defense against this problem.

▶ Trash unit model #EX32R 32 Gallon capacity with model FT-32 flat top cover.

◀ Trash unit model #EX32R 32 Gallon capacity with model DT-32 Dome top cover.

◀ Model #358H-V ADA Accessible freestanding square seating unit.

Metal Mesh Outdoor Furniture :: Elastomeric Powder Coat Enamel Finish

Outdoor Facilities :: Installation Gallery

▲ Nease High School in St. Augustine, FL with school colors and enclosed trash cans fill this patio area with seating al fresco.

▲ Leesburg High School in Leesburg, FL Freestanding round seating units for 8 people in an enclosed courtyard area.

▲ Sebastian River High School in Indian River County, FL combines the freestanding 8-seater units with umbrellas for shade.

▲ Bo, we did not doctor the photograph. These are the actual wood tables we replaced with the new 8-seater units. Which would you rather sit on?

▲ At Belvedere Elementary School in West Palm Beach, FL we created a comfortable seating area with these cored-in-the-cement 8-seater square top units.

▲ At Landrum Middle School in St. Augustine, FL these cored-in 8-seater units provide seating at a school whose enrollment has skyrocketed – and they can't all fit into the original small cafeteria.

Outdoor Facilities :: Shelter

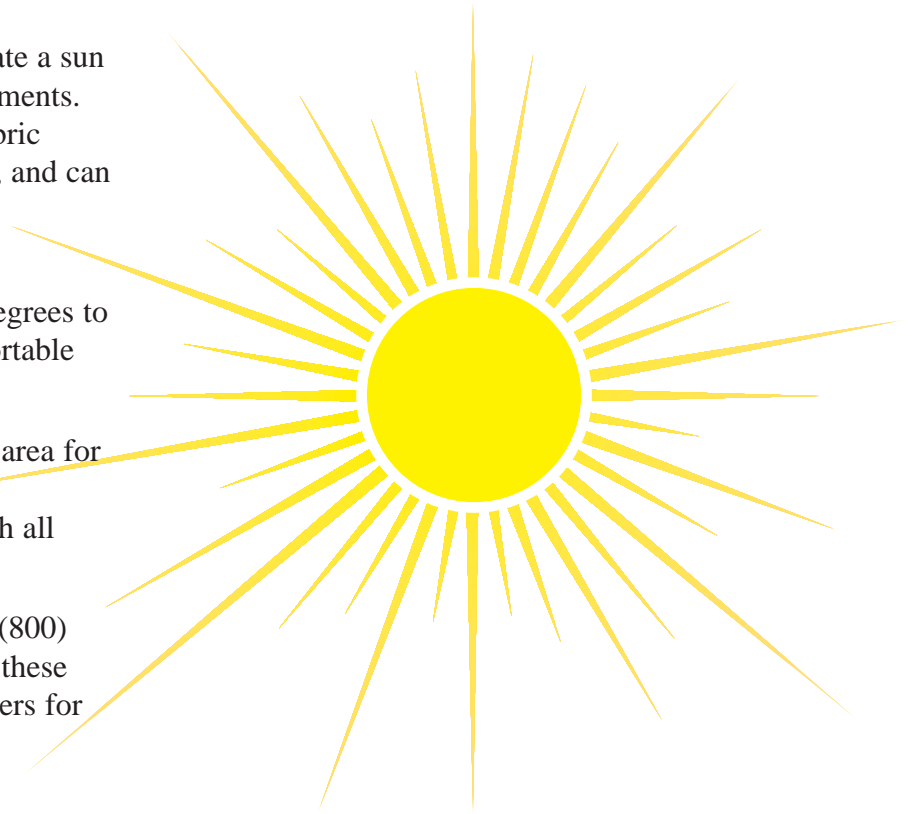

The Apollo Sunguard System can create a sun shelter for your specific space requirements. They are constructed of breathable fabric canopies that are 80% water repellent, and can block up to 97% of UV rays.

This protection can lower the ambient temperature under the shelter by 20 degrees to make the outdoor dining area a comfortable environment for your students.

Now you can easily provide a shaded area for your overflow outdoor seating due to enrollment growth — and comply with all DSA shelter standards.

Please call Barry Schuster toll free at (800) 330-7328 for more information about these durable, sturdy Apollo Sunguard shelters for your school.

Outdoor Facilities :: Grab 'n' Go Stand-up Height Tables

BEFORE

The new Grab 'n' Go table is HOT! Just like kids use at the mall — Five kids can stand around the table with a place to put their tray.

No more food spilled while kids walk and graze. This gives a high turnover rate for greater student capacity in a limited space.

AFTER

At Millikan High School in Long Beach, California, the students were walking around and dropping a lot of trash. We designed these stand-up height tables so students could stand around, talk, eat and leave. It lessens the spilled food and provides efficient use of the outdoor area.

Outdoor Facilities :: Grab 'n' Go Stand-up Height Tables

► Palm Beach Central High School in West Palm Beach, Florida wanted to get a lot of kids into a small outdoor area. these stand-up height tables are perfect for this application.

◀ We combine the sturdy stand-up tables with large waste receptacles to provide a pleasing place for trash to be deposited.

◀ The tables are cored into the patio for stability and security. **These units will not walk away!**

Outdoor Facilities :: Grab 'n' Go Stand-up Height Tables

◀ This covered patio area at Graves Middle School in South Whittier, California can accommodate 80 students who eat, talk to their friends and leave. Great turnover for a busy dining space.

▼ These special “around the column” tables were designed for Manatee High School in Bradenton, Florida. To allow us to provide 100 or more eating spaces in an area that was unusable before we created the custom tabletop. Even when you have columns and vertical obstructions outside, our designs can accommodate them and turn them into useful dining table spaces. Call us today to discuss your specific needs based on your building architecture.
