

## Pedestal Table Mover & Chair Cart

▲ Here is a mover specially designed to allow your plant managers to easily relocate pedestal tables for your multi-purpose areas. The cart goes under the pedestal table, lifts the table up off the floor and then it is able to be wheeled to the side of the room.

▲ The chair moving cart grabs a stack of up to 7 Taylor style chairs to quickly move them off to the side of the room.

▲ Jim Saunders shows how easy it is to move freestanding chairs in the dining room.
